#Making **lemonade**™

pink lemonade project®

We deliver **breast health education**
and **supportive care** for people
diagnosed with breast cancer.

MISSION:

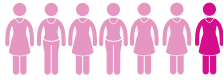

to educate, empower, and support all
communities affected by breast cancer

VALUES:

integrity, inclusivity, empathy,
collaboration, clinically-advised

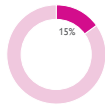

Pink Lemonade Project is a nonprofit, serving SW Washington and all of Oregon, that provides valuable breast health education, resources for early detection, and critical programs for people with breast cancer.

FACTS:

1 IN 7 WOMEN in the Pacific Northwest will likely develop breast cancer

20%-30% OF THOSE DIAGNOSED EARLY are likely to experience a recurrence

10%-15% OF CASES are due to family history

CURRENT CHALLENGES:

- **Screening rates** in Oregon and Washington have dropped by 11%.
- **More younger women** are being diagnosed with aggressive forms of breast cancer.
- **Underserved and rural populations** are experiencing more later-stage diagnoses and death.

Research shows that early detection and access to care can significantly improve health outcomes. Community connections, nutrition, and exercise can reduce new breast cancer diagnoses, and breast cancer recurrences.

Why Pink Lemonade Project exists:

By partnering with healthcare and human service organizations, Pink Lemonade Project stays informed about current breast cancer data, gaps in care, and emerging needs. These insights strengthen breast health awareness, improve access to screening resources, enhance survivorship, and quality-of-life support through diverse programs for patients, survivors, and individuals living with metastatic breast cancer.

PROGRAMS:

- **Early Detection Resources**
- **Expert Education**
- **Financial Assistance**
- **Mentorship**
- **Metastatic Breast Cancer Programs**
- **Retreats**
- **Social / Learning Activities**
- **Support Groups**

IMPACT WORK:

- Community Health Worker education project
- Breast health awareness events with faith-based organizations
- Resource compilation and updates for patients and providers
- Partnerships to expand screening events to underserved communities
